Experience

Freelance Software Developer
Self-employed

Remote
Sep 2019 – Present

- Designed and developed web applications using HTML, CSS, JavaScript, React, Django, and Next.js.
- Implemented database solutions with PostgreSQL, MySQL, Oracle, and SQL Server.
- Built responsive and modern UIs using Tailwind CSS and additional design tools.
- Integrated RESTful APIs and interactive components to enhance user experience.
- Used Git for version control and collaborated on projects through GitHub.

Universidad Politécnica Salesiana del Ecuador
Summer Research Intern

Quito, Ecuador
Month Year – Month Year

- Designed survey questions targeting students across the national Salesian school network.
- Aimed to understand cognitive and social perceptions of childhood, adolescence, and youth.
- Tabulated and visualized survey data in Excel, including results from children, teenagers, and young adults.

Leadership & Activities

Unidad Educativa "San Luis Gonzaga"
Student Volunteer

Quito, Ecuador
September 2012 - July 2018

- Delivered food baskets to low-income families and elderly residents in the Armenia neighborhood.
- Volunteered at a local school, supporting children from underprivileged backgrounds through educational and recreational activities.
- Helped serve meals to people in need at the Iglesia del Robo in Quito's Historic Center.
- Assisted indigenous communities in agricultural work in the páramo, while learning about their traditions and culture.
- Provided tutoring and educational support to individuals facing addiction and personal challenges.
- Taught football classes at an orphanage, encouraging physical activity and emotional well-being among children.
